EDUCATION

Pandit Deendayal Energy University

B.Tech in Computer Engineering; CGPA: 9.35/10

Gandhinagar, India

Aug. 2023 – May 2027

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Distributed Systems

Backend & APIs: FastAPI, Node.js/Express, REST APIs, SIP/RTP protocols, MySQL, MongoDB, Redis, Docker, Nginx

AI/ML: PyTorch, XGBoost, LangChain, LangGraph, RAG Pipelines, Vector Stores (FAISS, Pinecone)

EXPERIENCE

5G Use Case Lab, Indian Institute of Technology Gandhinagar

Research & Development Intern – Networking Systems

Gandhinagar, India

May 2026 – Aug. 2026

- Delivered a modular VoIP communication system design covering end-to-end call setup, measured by successful registration, session establishment, and termination logging across all test flows, by architecting separate **SIP** signalling and **RTP** media-transmission modules on **Python** for scalable internal communication use cases.
- Reduced simulated 5G edge-node overload response latency by **18%** versus baseline threshold rules, measured on O-RAN testbed simulations, by researching AI-driven network slicing and building **Python**-based LSTM/**XGBoost** models to predict overloads and re-prioritize slices.

BrainyBeam Technologies

Web Development Intern

Gandhinagar, India

May 2025 – Jul. 2025

- Cut average API response latency by **40%** for internal business applications, measured across high-throughput endpoints, by deploying an **Nginx** reverse-proxy load-balancing layer and integrating **Redis** in-memory caching to reduce redundant database I/O.
- Shipped production **REST APIs** with minimal post-release defects, measured through peer code review and rigorous unit/integration testing, by building **Node.js/Express** services with optimized relational schemas, strict separation of concerns, and async request handling at scale.

PROJECTS

PROTRACT – AI Financial Fraud Detection System | *Python, PyTorch, GNN, XGBoost, FastAPI, RAG* Jan. 2025

- Achieved **94%** fraud classification accuracy across **10,000+** transaction records, measured against held-out ground-truth labels, by designing a Graph Neural Network to detect multi-hop and circular fraud patterns.
- Reduced false-positive fraud alerts by **38%** versus threshold-based baselines, measured on the same test set, by combining the **GNN** with **XGBoost** and deploying via **FastAPI** for real-time inference; won **1st place** among **1,200+** teams at HackNUThon 6.0.

NexusCRM – CRM Intelligence Platform | *Python, LangChain, SQL, Docker*

May 2026

- Cut report generation time by **~65%** for business users, measured against manual reporting baselines, by implementing a natural-language-to-**SQL** (SOQL) query engine with **LangChain** for conversational data access.
- Delivered a scalable multi-tiered CRM platform integrating live **Salesforce REST API** data with relational (**MySQL**) storage, measured by successful win-probability forecasting across combined data sources, by building AI-powered scoring pipelines with **Docker**-based deployment.

Paper2Voice – Fault-Tolerant Multimodal Processing Pipeline | *Python, LangGraph, Gemini API* Dec. 2024

- Processed **30+** research papers with zero pipeline failures at **2–12 min** end-to-end latency, measured across full production runs, by designing a modular, fault-tolerant distributed pipeline with **LangGraph** to extract findings, structure dual-speaker scripts, and synthesize 44.1kHz audio.

ACHIEVEMENTS & CERTIFICATIONS

Hackathons: **Winner** – HackNUThon 6.0 (CSI Nirma University) & PDPU Breach; **1st Runner-up** – Au Ingenious Hackathon; **Top 100** colleges nationwide – Bajaj Hackathon; **Top 750** – Google AI Hackathon

Competitive Programming: Codeforces (**Specialist**); Leetcode **Knight** (max rating **1861**); **800+** DSA problems solved

Certifications: LLM & Generative AI Masterclass – Udemy; Workshop on Healthcare 4.0 using Python – PDEU; NPTEL Entrepreneurship (**Top 1%**)
